Professional Summary

IT Support and Systems Engineering professional with 4+ years of experience supporting end users, resolving service desk incidents, troubleshooting workstation and remote-work issues, coordinating software deployments, maintaining endpoint compliance, and producing technical documentation for non-technical users.

Core Skills

Support	Service desk, incident intake, ticket management, triage, escalation, SLA awareness, end-user support
Systems	Windows troubleshooting, Microsoft 365, Azure Virtual Desktop, BeyondTrust, VPN validation, Excel reporting
Endpoint	SCCM communication, SentinelOne/S1, BitLocker, Zscaler, endpoint follow-up, compliance tracking
Development	Java, C, HTML, CSS, WordPress, Shopify, database concepts, SEO, graphic design

Professional Experience

Systems Engineer

Sutherland Global Services | Feb 2024 - Present | Kingston, Jamaica

- Provides daily technical support and systems administration assistance for workstation issues, remote-work access, software access, virtual desktop support, and service desk tickets.
- Supported rollout of an internally built software replacement through installation support, deployment coordination, documentation, user readiness, and post-deployment assistance.
- Maintains WAH readiness tracking covering client-tool requirements, VPN needs, testing results, and readiness notes.
- Supports compliance monitoring for SCCM host communication, SentinelOne/S1, BitLocker, Zscaler, and endpoint follow-up.

Infrastructure Specialist

Sutherland Global Services | 2020 - 2023 | Kingston, Jamaica

- Delivered email, phone, chat, and remote technical support for workstation, access, software, remote desktop, and connectivity issues.
- Managed service desk tickets from intake through resolution or escalation and translated technical issues into clear instructions for non-technical users.
- Supported data entry, database/data management, reporting, asset tracking, and user/system information tracking.

Selected Projects

- Medi-Link NFC Medical Band System: emergency medical band concept with compact offline medical fields, UID links, checksums, record versions, and verification status.
- Begoogable AI Website Builder: AI-powered website generation platform focused on usable page structure, editable blocks, and local business visibility.
- Internal Software Replacement Deployment Support: rollout coordination, installation support, documentation, and user readiness for a replacement internal tool.
- Work-at-Home Program Bluebook: centralized tracking resource for client tools, VPN requirements, testing outcomes, and readiness checks.

Education

- Bachelor of Science in Computer Science, University of the People - in progress
- Bachelor of Science in Computing, University of Technology, Jamaica - withdrawn, 2022
- Diploma, Ardenne Extension High - 2018 to 2020
